Projects

Strontium → { 🔗 **Demo}**

Developed a functional clone of Spotify, named Strontium, showcasing proficiency in front-end development. Implemented responsive design to ensure compatibility across various devices and screen sizes**.**

Contact-App → { 🔗 **Demo}**
This contact app built with ReactJS and Redux allows users to effortlessly add, manage, and view their contact list. With data securely stored in localStorage, users can access their personalized contact list anytime.

HireHub → { 🔗 **Demo}**

HireHub is a modern job-seeking platform where users can browse job listings, apply for jobs, and track the status of their applications. Built using the MERN stack and Redux Toolkit for state management
